PetTag

pet-tag.app

Give them a way home.

A QR code tag for dogs and cats. Whoever finds your pet scans it with their phone camera and can reach you in seconds. No app, no subscription.

1 Set it up in a minute

Scan your tag, make a free account and add your pet's name, photo and notes.

2 Someone finds them

They scan the tag with their phone camera and your pet's page opens.

3 You hear from them

They message you, and can share their location with one tap.

Lost mode. If your pet goes missing, switch it on. Anyone who scans the tag sees they're missing, and you're emailed when it's scanned.

Private by default. Your number and email stay hidden. Finders message you through the page until you choose to share more.

Try it now

Scan this code with your phone camera. Our demo dog Biscuit's page opens, just as a finder would see it.

From £10, paid once **Free UK delivery** **14-day money-back guarantee** **Printed in the UK**

In public, UK law says a dog's collar or tag must show the owner's name and address, so a PetTag goes alongside an engraved tag.
